📍 Chennai, Tamil Nadu, India

ABOUT ME

Junior Software Engineer with hands-on experience in AWS, AWS Bedrock, Amazon Bedrock AgentCore, AI agents, and cloud-based application development. Skilled in building AI-powered solutions using Python and JavaScript, with experience in agent orchestration, workflow automation, API integration, and enterprise AI use cases. Strong understanding of AWS services, REST APIs, MERN stack, SQL, and machine learning, with a focus on developing scalable, reliable, and production-oriented software solutions.

WORK EXPERIENCE

Junior Software Engineer Intern | 2026 - Present

- Developed AI-powered enterprise solutions using AWS, Amazon Bedrock, AgentCore Runtime, and Strands Agents, focusing on agent-based workflows and real-world business use cases.
- Built and integrated AI agents, MCP tools, REST APIs, and Knowledge Bases using Python, enabling agents to interact with tools and retrieve relevant contextual information.
- Designed agentic workflows and business process automation using Flowise and Activepieces, including task coordination, SLA monitoring, escalation handling, notifications, and workflow state management.
- Developed backend and full-stack applications using Python, JavaScript, Node.js, React, and SQL, with experience integrating REST APIs and AI capabilities into web applications.
- Developed and customized WordPress websites using PHP, JavaScript, HTML, CSS, and BuddyBoss, including custom UI components, API integrations, user-related functionality, and WordPress customization.
- Gained hands-on experience with core AWS services including EC2, IAM, S3, Lambda, EBS, Elastic Load Balancing, and Auto Scaling, covering cloud infrastructure, access management, compute, storage, and scalability.
- Worked on an AI-driven healthcare operations use case involving discharge coordination, department task management, SLA monitoring, automated escalation, bottleneck identification, and operational recommendations.

SKILLS

- AWS
- AI Agent
- MERN Stack
